

Mechanical Design Engineer

JOB DESCRIPTION | 2–5 YEARS OF EXPERIENCE

ROLE	EXPERIENCE	CORE SKILLS
Mechanical Design Engineer	2–5 Years	CAD · 2D Drawings · GD&T

Role Overview

TVSPL is looking for a Mechanical Design Engineer with 2–5 years of experience, with a sound understanding of engineering drawings, GD&T, and 3D modelling. The role involves contributing to projects from concept through realization and working with customers when required to gather detailed information and present planned arrangements.

Key Responsibilities & Requirements

- Understand and interpret 2D engineering drawings.
- Demonstrate a good understanding of Geometric Dimensioning and Tolerancing (GD&T).
- Create 3D models using any CAD software. Experience with NX and Solid Edge will be an added advantage.
- Be willing to work on projects from concept to realization.
- Be willing to travel to customer locations occasionally to collect detailed information and present planned arrangements.
- Have good communication skills.
